

## Taking care, living Better

Pierre Fabre is the 2nd largest dermo-cosmetics laboratory in the world, the 2nd largest private French pharmaceutical group and the market leader in France for over-the-counter products sold in pharmacies.

With nearly 10,000 employees worldwide, Pierre FABRE designs and develops innovative solutions that contribute to the well-being of all, from health to beauty combining the best of medical and naturalness. We achieve this by cooperating with health care professionals, our long-standing trusted partners, by drawing relentless inspiration from nature; and by placing pharmaceutical ethics at the very heart of our operations. We focus our research and manufacturing activities in South-West France where our roots lie.

We are proud to belong to a public-interest organization, the Pierre Fabre Foundation, which is dedicated to improving access to high-quality health care and medication in the poorest countries.

Our CSR commitment led to the creation of the Green Impact Index. A transparent score that uses 20 different criteria to assess the impact of its products. A method validated and approved by AFNOR Certification. It is the 1st tool that measures, improves and communicates on the environmental and societal impacts of cosmetics and family health care products.

Pierre FABRE portfolio includes several medical franchises and international brands including Pierre Fabre Oncology, Pierre Fabre Dermatology, Eau Thermale Avène, Klorane, Ducray, René Furterer, A-Derma, Naturactive, Pierre Fabre Oral Care, Darrow and Glytone.

The Avène Dermatological Laboratory, a combination of dermatological research and a healing water that has been tried and tested at the Avène thermal station for 30 years, develops high-performance care products that combine effectiveness and tolerance. Recognised by Dermatologists all over the world.

They are adapted to all skin types, even the most sensitive, so that everyone can find the confidence of a healthy and balanced skin

*\*Study based on internal data collected from more than 90 countries and an IQVIA survey in 8 countries in 2021*

A-DERMA, Vegetal Dermatological Laboratory, takes care of all fragile skins, from infants to seniors, thanks to the effectiveness of its dermo-cosmetic care products rich in Rhealba® dermatological Oat with rebalancing, soothing and repairing properties. A-DERMA is engaged in preserving the balance of Man and Nature on a daily basis by proposing, in particular, Eco-designed products.

LABORATOIRES  
**KLORANE**

Klorane selects the most powerful medicinal plants to treat all hair and skin needs, from birth to adulthood. We cultivate them, extract the most potent active ingredients and formulate them to guarantee the utmost efficacy, sensoriality and traceability. N°1 haircare brand in Europe.

  
RENE  
**FURTERER**  
PARIS

René FURTERER was founded by a visionary Parisian professional hairstylist, who was the first to create a scientific method linking hair beauty with scalp's health. Our professional cares are crafted by professional hair stylists, backed by scalped science and amplified by precious essential oils for transformative beauty results.

**DUCRAY**  
LABORATOIRES DERMATOLOGIQUES

Since 1930, Ducray Dermatological Laboratories has endlessly reinvented itself, always driven to move forward through innovation. Through its dual expertise in skin and hair care, the brand supports patients with skin disorders day after day, contributing to their well-being. In addition to its commitment to patients, Ducray also considers the environment and climate by offering biodegradable formulas and reducing the ecological footprint.

  
**Pierre Fabre**  
Medical Dermatology

For more than 30 years, Pierre Fabre Dermatologie has been committed to developing and marketing prescription drugs to treat skin diseases, allowing it to become a major international player in medical dermatology.

Our research is thus dedicated to the development of future prescription drugs in pediatric dermatology, dermato-oncology and rare diseases. The success of Pierre Fabre Dermatologie is based on listening to dermatologists and health care professionals at all times (to provide them with numerous services such as prescription assistance tools, and high-quality medical information).

  
**Pierre Fabre**  
Innovative Oncology

Oncology is one of the Pierre Fabre Group's priorities and the aim of our research is to improve the treatment and care of patients suffering from cancerous diseases, while remaining true to our values. We offer therapeutic solutions to treat different types of cancers including melanoma, breast cancer and colorectal cancer.

Prevent, Treat, Support

Our ambition? To make a positive contribution to the better-being of individuals with cancer, by facilitating their day-to-day care.
