

Power consumption and electrical Installations

Electricity is not included with any booth space, with the exception of 9sqm shell scheme booths.

The cost of **power consumption** for each exhibitor is calculated according to the kilowatt (kW) required at the stand. Each exhibitor, on the basis of the kilowatt required for his booth, must fill in the form below and order them. The form specifies the cost of 1 kilowatt: to obtain the total, multiply the unit cost by the kilowatt needed.

The exhibitor is also responsible for the cost of **electrical installations** within the stand; however, these installations may be carried out only by Pico Art International PTE LTD – WCD2023 Official General Contractor.

Please submit your electrical plan, clearly indicating the power socket and lights requirements, to: Pico Art International Jacelyn.leong@pico.com. They will calculate your needs accordingly and bill this cost to you. This is a separate rate not included in the rate of the present form.

Power consumption order form
